Well Testing Clinic

The SWCD is currently holding its annual low-cost well testing clinic. Tests are conducted by AC Water Analysis of Bemidji, a state-certified lab.

Test for Bacteria and Nitrates and/or Arsenic

Each kit is only \$15 during this event!

The Department of Health recommends that private drinking water wells be tested *at least* every two years for the three most common contaminants: nitrates and total coliform bacteria. Wells typically only need to be tested once for Arsenic.

Want to Participate?
It's as Easy as 1-2-3!

- 1) **Get your kit(s) from the SWCD Office located in the Baudette Post Office Building. \$15 for bacteria/nitrates and \$15 for Arsenic.**

*Pick up kits during office hours of 8:00 a.m. - 4:30 p.m.

*Bring cash or check (an upfront, non-refundable payment is required)

- 2) **Take your sample on Friday, August 21st before noon**
- 3) **Drop it off at locations in Baudette or Williams**

Drop off between 8:00 and Noon on Friday, August 21st
